Things to study:

The Village People are queer icons who manipulated the navy into helping them make this song which is actually anti-military (they literally have a verse to defect the draft). The tiktok sound bite doesn't capture the whole essence of the song nor all the lyrics. It's only propaganda if you're stupid, which unfortunately a lot of people are, and so was the Navy. Same with Just A Girl by Gwen Stefani and YMCA

Image has power. Style communicates ambition, identity, and belonging. Confidence completes the look.

Older Client needs: make it clear, show track record, talk about certainty, slow down, justify the value, sell the outcome, be professional

Younger Client needs: make it visual, show social proof, talk about identity, move fast, keep the price low, sell the dream, be informal

If capitalism rewarded intelligence, the richest would be neurosurgeons. If it rewarded talent, it would be artists. If it rewarded hard work, it would be labourers. But no, it rewards nepotism and the theft of personal data to sell targeted advertisements

have the wisdom to know when to go with the flow and when to resist (india - ignore everything and win; china - do nothing and win)
