 Books I'm Reading

Advices:

- 4 workplace advices:
 - Deadlines are not real. If you need more time to do a good job, you're entitled to that. Just communicate it clearly
 - Don't talk down to less technical people. Learn to explain and communicate better. Be kind. Belittling people hurts your soul.
 - Don't overwork yourself at the start of a new job.
 - Don't ramble during standups. Being concise gets you noticed.
- Do research on the company before the job interview. Mission, what they stand for, what they value in an employee. Have a real conversation back and forth. Don't act like a robot. When asked to tell me about yourself, don't read off your resume. Tell them what drives you, your favourite things to do and then go into your resume
- Ask for big, unreasonable things. The universe will meet you at your level of audacity.
-
